entre na pasta e apague o arquivo que estiver lá;

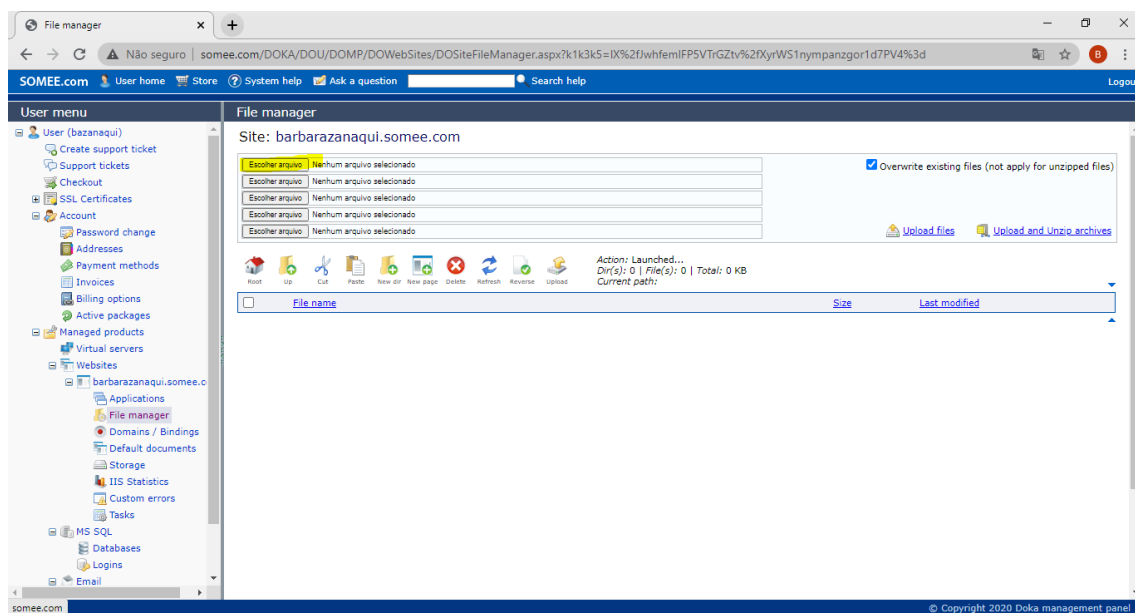

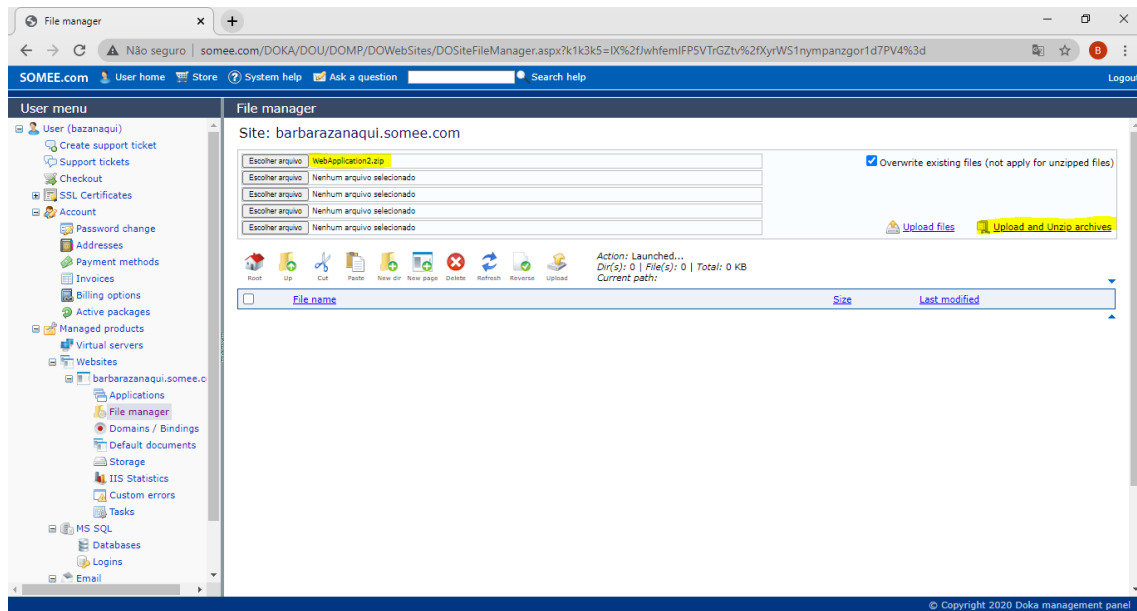

AGORA PARA PUBLICAR O SEU WEBSITE:

1. Compacte (tem que ser .zip) todos os arquivos que estão em WebApplication2>>WebApplication2 (sao os arquivos e pastas que são vistos no gerenciador de solução do visual studio);
2. Agora volte ao painel de controle do somee, em gerenciar arquivos e escolha a opção UPLOAD (um icone na parte superior da janela)

3. Selecione "escolher arquivo" selecione o seu pacote.zip e em seguida "Upload and unzip archives"

PRONTO, VOCE VERÁ SEU SITE NA INTERNET
